A CEMENT SECTOR SPECIAL

23 - 24 April 2024, Hyatt Centric - Delhi

The Indian cement industry is keen to adopt WHRB systems in a big way. The technical specialization within the Indian cement industry is advanced; the plant operating team can overcome the technical barriers analyzed. The major deterrent in faster adoption of WHRB systems has been the financial barrier. The potential for WHRB in Indian cement industry is very high.

With its objective to promote WHRB installations in India, Mission Energy Foundation brings out its **5th annual cemWHR – 2024** a two day Conference + Awards; scheduled on **23 - 24 April 2024, Hyatt Centric - New Delhi.**

### the CONFERENCE

Organised with its objective to promote Waste Heat Recovery Boiler implementation in the Indian Cement industry. It shall encourage utilities that utilises the waste heat available to generate power and thereby reducing operating cost. Bring awareness among industry on suitable technologies may be considered for implementation of WHRB in existing and future cement plants.

### the AWARDS

Over the years Mission Energy Foundation have honoured hundreds of innovative developments and solutions for excellence and sustainability among the utilities, small or large, who have demonstrated their efforts in generation of clean energy.

### History of Past Conferences

A CEMENT SECTOR SPECIAL

23 - 24 April 2024, Hyatt Centric - Delhi

## A LITTLE BACKGROUND...

Indian cement industry is the second largest manufacturer of cement, only next to China. Cement capacity in the last 5 years has increased by over 30% and the projected growth rate in the next 5 years is about 20% increase from present levels of manufacture. Cement sector is one of the fastest growing industrial sectors in India.

Indian cement industry is very advanced as far as energy efficiency is concerned. Some of the Indian cement plants operate with very low energy consumption levels, which are the best in the world. Latest technology adoption and continuous improvement has been the predominant factors for such high energy efficiency levels in Indian cement industry.

While energy efficiency has taken a top priority in Indian cement industry, the adoption of WHR systems in cement facilities has still a long way to go. Out of over 210 large cement plants in the country, only 70% of cement kilns have adopted WHR systems. Mission Energy Foundation estimates indicate that the waste heat recovery potential in Indian cement industry is close to 750 MW, indicating the huge opportunity for adoption of WHR in Indian cement industry.

Almost all the cement manufacturers in the country have captive power plants to meet their power demand. The reason for captive power generation is to lower the cost of power generation. Installing captive power plants would cost the cement manufacturers about Rs 40 Million per MW. On the other hand, installing WHR systems is costing the manufacturers about Rs 70 Million to Rs 80 Million per MW depending on the type of technology adopted and the WHR potential. This high initial investment is deterring manufacturers from adopting waste heat recovery systems.

Huge potential exists across the Indian cement industry to recover the waste heat and generate power. Cement industry being energy intensive, tapping waste heat can be an excellent opportunity to reduce the overall operating cost. Increased global GHG emissions are forcing the industrial sectors to operate in an energy efficient and environment friendly way. Implementation of waste heat recovery can substantiate fossil fuels used for power generation which will ultimately reduce GHG emissions.

### NEED FOR WHRB SYSTEMS

On an average, the Indian cement plant requires power of 9 Billion kWh per year. The coal needed for generating this much amount of power accounts to 15 Million Tons per year. To meet out the required coal quantity, the industry spends about Rs 55 Billion each year. In order to bring down the cost towards energy, several cost reduction techniques such as using of pet coke and low grade coal, optimization of Indian coal with imported coals are being practiced.

Waste heat recovery is now emerging as an excellent addition to existing captive power generation. Other than reducing energy cost significantly, it can also be a reliable source of power. The concept of waste heat recovery is slowly picking up across the country.

### Why WHRB Systems?

#### ADVANTAGES OF WHRB SYSTEMS

Reduces fuel consumption, which in turn reduces fuel cost significantly

Simultaneously meet the demand for electricity and heat in a most cost effective manner. It bring down the specific energy consumption of the plant significantly.

WHRB is about best energy efficient practice in the plant & provide economic competitive advantage in the market. The system also mitigate the emission of Green house gases which are affecting the environment adversely.

23 - 24 April 2024, Hyatt Centric - Delhi

## Technical Barriers

Moisture content in raw material  
Heat requirement for raw mill. Heat requirement for  
Cement Additives  
Quality / Grade of heat. Presence of dust  
Water Availability for waste heat recovery. Lay out  
constraint & down time for hook up

Significant In house Engineering requirement. WHR -  
Vendor identification in India. Execution by in house  
contracts. Interfacing between OEC & WHR system.  
Location of unit to minimize distances – layout  
considerations.  
Hook up during Plant shutdown

## Challenges Faced

## Available Technologies

Rankine Cycle  
Organic Rankine Cycle  
Kalina Cycle

Presence of dust in flue gas  
Hot gas availability & Load factor  
Adaptability of existing equipment  
False air ingress and additional power consumption  
Non-availability of Indigenous suppliers & Service  
providers  
Financial barriers

## Barriers in Adopting WHRB

## Presentation and Paper Submission

The Programme Committee encourages you to send abstracts/papers. The abstract must not exceed 8 pages for oral presentation with tables and illustrations. Abstracts/papers will only be accepted in electronic form (MS Word) to be submitted by email to below.

The deadline for abstracts/papers submission is **Thursday, 29 February 2024**.

A CEMENT SECTOR SPECIAL

23 - 24 April 2024, Hyatt Centric - Delhi

## SPONSOR NOW

Our aim is to deliver you an event that exceeds your expectations, thus becoming an integrated part of your annual marketing program.

Sponsoring our conferences will make your company stand out as a leader in this burgeoning industry and will leave a strong impression of your brand in key decision makers minds. Sponsors have an incredible amount of presence and it will not only give your company optimum exposure but also the opportunity for delegates to meet you and your executives to find out more about your role and business opportunities in the sector.

- Gain **PUBLICITY** with our advertising and promotional campaigns
- Obtain **DIRECT ACCESS** to potential clients during and after with our meticulously prepared confidential delegate list
- Receive a **KEY SPEAKING POSITION** to address an audience of top executives and decision makers from the industry
- Create **PERMANENT REMINDERS** of your product or services in conference documentation
- Profile yourself as **INDUSTRIAL LEADER**, as your corporate logo and profile will be featured prominently in event marketing collaterals
- **NETWORKING** with the industries leading Government Officials, Senior Level Delegates and Experts
- Achieve **GREATER EXPOSURE** and **BRAND BUILDING** through our partners and much more

A CEMENT SECTOR SPECIAL

23 - 24 April 2024, Hyatt Centric - Delhi

**cemWHR Awards 2024** shall once again recognise outstanding environmental and community relations efforts that go above and beyond what is required. Submissions from plants across the country shall be evaluated and recognized for environmental & energy efficiency efforts completed in FY 2022

### the WINNERS

The Winners of **cemWHR Awards - 2024** shall be honored during the valedictory session of the conference on the second second day i.e., **24 April 2024**.

### Important Dates

**15 February 2024**

1100 Hrs - Nomination Opens

**31 March 2024**

1700 Hrs - Nomination Closes

**24 April 2024**

Winners Shall be Honoured

### Past Winners

- Bharathi Cement
- Dalmia Cement
- Dalmia Cement (Bharat) Limited (Banjari)
- Dalmia Cement (Bharat) Limited (Dalmiapuram)
- Dalmia Cement (Bharat) Limited (Meghalaya)
- Dalmia DSP
- J K Cement
- JK Lakshmi Cement
- JK Lakshmi Cement Limited
- Nu Vista Limited
- Nuvoco Vistas
- Prism Johnson
- RCCPL
- Shree Cement
- Shree Digvijay Cement
- Shree Digvijay Cement Company Limited
- The Ramco Cement Limited (Jayanthipuram)
- The Ramco Cement Limited (Kolimigundla)
- Turbotech Projects & Services

### cemWHR AWARDS Categories

**Cement Plant of the Year**

**Cement Project of the Year**

**Environmental Excellence**

**Innovation for Sustainability**

**Technology / Solution Provider**

**Equipment Supplier**

Submit Power Point Presentation in form of CASE STUDY showcasing the work done in the selected category of award nomination that have helped you to achieve better results to help@missionenergy.org within 10 days of your nomination.

Residential  
USD 1250

## 3 Golden Accommodation Rules

**Mentioned Residential fee is on Twin Share Room Basis at the conference venue**

**Residential participants shall be provided Twin Share Room for 2 nights**

**If a participant desires a Single Occupancy Room, then an additional amount of INR 15000 + 18% GST shall be charged on the respective registration fee**

# Organiser

## The Organisation

Mission Energy Foundation is a persistent, private, not-for-profit endeavour based in Mumbai, India. We are registered under sec 25 (1), 80G & 12AA respectively.

## The Beginning

A single man army with its mission to build platforms of discussion, exchange knowledge among industry professionals on core issues pertaining to growing energy sector.

## GOAL

Mission Energy Foundation is a micro-enterprise initiative that strives to spread knowledge in the globalising energy sector. We educate and spread technology awareness through ongoing contacts and discussions with the public and industry concerning what the future of the growing energy sector should be...

## Today

A human asset working together as one endeavour that expertise in organising and delivering successful international summits involving who's who from Entrepreneurs to Academicians to Government Authorities to Technology Providers to Consultants to Industry Professionals from the growing energy sector globally.

 IFSC / RTGS: KKBK0000649  
 SWIFT Code: KKBKINBB

All bank charges to be borne by payer. Please ensure that our bank receives the full invoiced amount.

You want to pay from credit card (Only Indian VISA Cards accepted) you may do it from below link <https://missionenergy.org/payment.html>

## Payment Terms

Payment is required within 10 working days on receipt of invoice. If a booking is received 10 working days before the conference a credit card number will be taken to confirm your place, likewise if full payment has not been received before the conference date.

- NOTE:**
- Kindly fill the registration form completely
  - Kindly provide with a valid email id for correspondence
  - A confirmation of the registration will be sent via email after receipt of the payment
  - No refund will be made in case of no-show / no-attendance
  - Registration fee is exclusive of Government taxes as applicable

### Cancellation Policy:

Should a delegate be unable to attend, a substitute delegate from the company is always welcome at no extra charge. Alternatively, for any cancellations, the following rules shall apply

- 70% refund of registration fee if cancellation is done on or before 20 working days of the schedule
- 50% refund of registration fee if cancellation is done on or before 15 working days of the schedule
- Thereafter, no refunds can be made

### Important note:

Please quote the name of the participant and event title on the advice when remitting payment. Bank charges to be deducted from the participation organisation's own accounts. Attendance will only be permitted upon receipt of full payment. It may be necessary for reasons beyond the control of the organiser to alter the content or the event date or location or the identity of the speaker/s.

## Payment Terms

Payment is required within 10 working days on receipt of invoice. If a booking is received 10 working days before the conference a credit card number will be taken to confirm your place, likewise if full payment has not been received before the conference date.

### NOTE:

- Kindly fill the registration form completely
- Kindly provide with a valid email id for correspondence
- A confirmation of the registration will be sent via email after receipt of the payment
- No refund will be made in case of no-show / no-attendance
- Registration fee is exclusive of Government taxes as applicable

### Cancellation Policy:

Should a delegate be unable to attend, a substitute delegate from the company is always welcome at no extra charge. Alternatively, for any cancellations, the following rules shall apply

- 70% refund of registration fee if cancellation is done on or before 20 working days of the schedule
- 50% refund of registration fee if cancellation is done on or before 15 working days of the schedule
- Thereafter, no refunds can be made

### Important note:

Please quote the name of the participant and event title on the advice when remitting payment. Bank charges to be deducted from the participation organisation's own accounts. Attendance will only be permitted upon receipt of full payment. It may be necessary for reasons beyond the control of the organiser to alter the content or the event date or location or the identity of the speaker/s.
