FLEXIBLE OPERATION OF THERMAL PLANTS

FLEX

A Bridge to Decarbonise Energy System

23 - 24 April 2024, New Delhi

India's only Platform Focusing on TPPs

Only Opportunity to Enhance your Learning & Business

12+ Technical Sessions including Panel Discussions

Gathering of Industry Leaders – WORLDWIDE

2 Days of Value Packed Interactive Sessions

Well attended by Government Dignitaries

3 Exclusive Award Categories

25+ Industry Presentations

150+ Participants

Organiser

2nd Annual Conference on FLEXIBLE OPERATION OF THERMAL PLANTS + 3 Exclusive Award Categories

<https://missionenergy.org/flex2024/> help@missionenergy.org +91 98560 98360

+ 3 Exclusive Award Categories

India has achieved 165.94GW of renewable energy capacity till October 2022 and has set ambitious revised targets for renewable energies to 500 GW by 2030. India can successfully integrate 390GW of wind and solar generation by 2030, an increase of more than 40% above the current renewable energy trajectory, at a total system cost that is lower than that of the current trajectory. By making both electricity supply and electricity demand more flexible, India can achieve these higher levels of clean energy, creating a modern, low cost energy system, while reducing carbon emissions.

This requires a radical transformation of the energy system in India, as approximately 65 percent of existing installed capacity currently comes from thermal power generation. The increasing share of variable renewable energies will result in less operating hours as well as in flexible operation regimes of India's conventional mainly coal-fired – power plants. The Indian coal – which is the key source for the majority of coal-fired power plants in India – has some special properties which also have an influence on the flexible operation. While this is expected to lower carbon emissions and help meet the growing energy demand, the integration of renewables into the grid will be a big challenge. Renewable energy generation suffers from fluctuations, predictable and unpredictable, due to uncertainty in weather conditions. To accommodate such sharp variations in generation, there has to be a multi-pronged approach including cyclic operation of gas and hydro-based generation, use of existing pumped storage systems, development of pumped storage and battery storage, adoption of demand management measures and flexible operation of coal-based plants for the optimization of the entire power system.

The increased share of feed-in from fluctuating renewable energies – mainly wind and solar – results in complex challenges for the energy system. In addition to other options such as grid and demand-side management, flexible conventional power generation plays a key role for ensuring adequate system stability. Therefore, existing coal-fired power plants need to adapt to a completely new operating regime.

On 30 January 2023, the Central Electricity Authority notified the Central Electricity Authority (Flexible Operation of Coal based Thermal Power Generating Units) Regulations, 2023. The provisions came into force from the date of notification.

Almost half of the coal-fired units have a capacity of more than 500 MW. Approximately one third accounts to units with a size of less than 250 MW. Two third of the installed coal base was commenced after 2003. Furthermore, the Indian plants are faced with new, stricter emission requirements. These requirements will result in massive retrofits of existing plants with DeNOx and DeSOx technologies.

Low minimum load requires coal treatment. Taking the Indian situation into account, the following aspects should be reflected for a more flexible operation of Indian power plants:

Applicability: All coal based thermal power generating units owned or under control of the Central Government, State Government or owned by any private company, connected with the grid and to the load despatch centers.

Key Points: Units should be designed in a way that they comply with these regulations for the full range of ambient and environmental conditions prevailing at the site. These generating units should be capable of providing flexible operation as per the phasing plan specified by the Authority from time to time. Minimum power level of these generating units should be 40%. These generating units should have the ramp rate capability of minimum 3% per minute for their operation between 70% to 100% of maximum continuous power rating and should have ramp rate capability of minimum 2% per minute for their operation between 55% to 70% of maximum continuous power rating.

"A lot more literature about flexibilisation of thermal power plant exists around which is noteworthy. But it is more imperative to attend this important conference "Flexible Operation of Thermal Plants" to learn & discuss the technical challenges & understand latest notification in this current phase of Energy Transition & Decarbonisation"

2nd Annual Conference on FLEXIBLE OPERATION OF THERMAL PLANTS + 3 Exclusive Award Categories

<https://missionenergy.org/flex2024/> help@missionenergy.org +91 98560 98360

The flexibility potential by means of I&C adjustments is significant because the level of automated and advanced controls leave room for improvements. Especially with respect to a fast and efficient start-up, manual interventions should be reduced to a minimum. In order to enhance the dynamic behaviour of the plant and to positively contribute minimum load and cycling operation, advanced unit control concepts such as condensate throttling and throttling of the extraction steam for the HP pre-heater are very beneficial. This modification helps fulfilling the requirement of providing 5 percent frequency control power

The standard design and set-up of Indian coalfired power plants entails some favorable configurations for flexible operation – e.g. they are equipped with a high number of mills, tilting burners and frequency-driven fans and actuators. Due to the coal quality it is unlikely that Indian power plants are able to reduce the minimum load below 25 percent without any additional coal treatment. Therefore, a concept for homogenization and enhancing coal quality should be developed. Such a concept could include washing, blending, coal cleaning at site as well as online coal analysis.

The standard design and set-up of Indian coalfired power plants entails some favorable configurations for flexible operation – e.g. they are equipped with a high number of mills, tilting burners and frequency-driven fans and actuators. Due to the coal quality it is unlikely that Indian power plants are able to reduce the minimum load below 25 percent without any additional coal treatment. Therefore, a concept for homogenization and enhancing coal quality should be developed. Such a concept could include washing, blending, coal cleaning at site as well as online coal analysis.

The flexibility potential by means of I&C adjustments is significant because the level of automated and advanced controls leave room for improvements. Especially with respect to a fast and efficient start-up, manual interventions should be reduced to a minimum. In order to enhance the dynamic behaviour of the plant and to positively contribute minimum load and cycling operation, advanced unit control concepts such as condensate throttling and throttling of the extraction steam for the HP pre-heater are very beneficial. This modification helps fulfilling the requirement of providing 5 percent frequency control power.

Low Minimum Load is the Most Important Flexibility Dimension

Flexible power plant operation comprises three dimensions: low minimum load operation, short and efficient start-ups and shut-down and high ramp rates. Most measures for flexibility enhancement aim at low minimum load operation. This is very important for the provision of residual load and in times of low demand, it is more economic than shutting down the whole plant. The transformation from base-load to flexible operation is a change process that requires strong management and leadership, skilled employees and appropriate technology. There is no generic concept or single implementation plan for power plants, as each plant has its own specifics, technology requirements and site conditions. However, there are some actions and steps that need to be taken in order to tap the flexibility potential of a single plant.

The flexible operation of coal-fired power plants requires suitable technologies, skilled people and leadership with foresight. In addition, it needs to be recognized that this new operating regime implies a change process that can only be managed successfully with a holistic approach.

The Instrumentation and Control (I&C) system plays a crucial role for flexible operation. Plant status transparency, the availability of operating data, sophisticated data assessments and advanced controls are a prerequisite for operating a power plant with enhanced flexibility. Moreover, the I&C system is the link joining all aspects important for efficient plant operation. It should be in the focus of any flexibility project as the benefits and the cost effectiveness are unbeatable. With respect to further digitization, I&C optimization offers even more potential, by enabling efficiency and flexibility enhancements at the same time.

2nd Annual Conference on FLEXIBLE OPERATION OF THERMAL PLANTS + 3 Exclusive Award Categories

<https://missionenergy.org/flex2024/>
help@missionenergy.org
 +91 98560 98360

Flexible operation needs a holistic approach. The conference is designed to discuss strategies for a co-ordination amongst all the sources of generation and find a way out for the flexibilisation of the thermal power plants. Also, impheise on regulatory interventions including revised tariff structure for the flexible operation of thermal power plants for deployment of this change process in existing power plants by addressing the following questions:

- What procedures have proven successful for identifying and implementing flexibility measures?
- What are the proven technical measures to adapt existing plants to flexible operation?
- What are the consequences for the Operation & Maintenance (O&M) of the plant?
- What are the requirements for the personnel? Which training are useful?
- What are the tasks the plant management needs to address?

Who Should Participate?

Power Plants & Policymakers

- Thermal Power Plants
- Captive Power Plants
- Independent Power Producers
- State-Owned Gencos
- Other Power Generators
- Load Dispatch Centers
- Policymakers and Regulators
- Pollution Control Boards
- R&D Organisations
- State Electricity Boards

Solution Providers

- EPC Companies
- Instrumentation & Monitoring Solution Providers
- Power Plant O&M Providers
- Other Technology Providers
- Equipment Manufacturers (Boilers, Turbines, Controls, Auxiliary Systems, etc.)
- Engineering Consultants
- Management Consultants
- Energy Efficiency Consultants
- Certification and Inspection Companies

Consultants & Others

- Engineering Consultants
- Management Consultants
- Energy Efficiency Consultants
- Regulatory Agencies
- Certification and Inspection Companies

CALL FOR SPEAKERS OPEN

If you are interested in speaking at the conference we are inviting you to put forward your presentation proposal for review by our international conference advisory board. Please note that not all submissions can be accepted but all will be considered ahead of the final submission deadline.

Deadline For Paper Submission Thursday, 29 February 2024

SPONSOR NOW

Our aim is to deliver you an event that exceeds your expectations, thus becoming an integrated part of your annual marketing program.

Sponsoring our conferences will make your company stand out as a leader in this burgeoning industry and will leave a strong impression of your brand in key decision makers minds. Sponsors have an incredible amount of presence and it will not only give your company optimum exposure but also the opportunity for delegates to meet you and your executives to find out more about your role and business opportunities in the sector.

- Gain **PUBLICITY** with our advertising and promotional campaigns
- Obtain **DIRECT ACCESS** to potential clients during and after with our meticulously prepared confidential delegate list
- Receive a **KEY SPEAKING POSITION** to address an audience of top executives and decision makers from the industry
- Create **PERMANENT REMINDERS** of your product or services in conference documentation
- Profile yourself as **INDUSTRIAL LEADER**, as your corporate logo and profile will be featured prominently in event marketing collaterals
- **NETWORKING** with the industries leading Government Officials, Senior Level Delegates and Experts
- Achieve **GREATER EXPOSURE** and **BRAND BUILDING** through our partners and much more

Power Plant Performance Awards - 2024

**Power Plant
PERFORMANCE
AWARD**

Power Plant Performance Awards has been developed with a view to accord recognition to utilities based on their all round performance by integrating the operational parameters like Peaking Plant Load Factor, Secondary Oil Consumption, Auxiliary Power Consumption and Station Heat Rate. Design station heat rate would be considered for evaluation.

OBJECTIVE

Power Plant Performance Awards – 2024 in its present form is intended to foster the competitive spirit amongst various power stations so as to encourage them to improve performance in all spheres of their working. The Awards would also help in evolving benchmarks for various performance indices..

Award Categories - 2024

**Power Plant
Performer ≤ 500 MW
– COAL**

**Power Plant
Performer ≥ 500 MW
– COAL**

**Power Plant
Performer ≤ 500 MW
– LIGNITE**

**Power Plant
Performer ≥ 500 MW
– LIGNITE**

**Power Plant
Performer ≤ 500 MW
– CCGT**

**Power Plant
Performer ≥ 500 MW
– CCGT**

**Power Plant
Performer – COAL
(CPP)**

**Power Plant
Performer – CCGT
(CPP)**

**Service Provider
– Technology**

**Service Provider
– O&M**

**Service Provider
– Design & Engg**

**Life Time
Achievement Award**

National Efficiency Awards – 2024

NATIONAL Efficiency Awards - 2024

The National Efficiency Awards has been developed with a view to accord recognition to utilities based on their all round performance by integrating the operational parameters like Peaking Plant Load Factor, Secondary Oil Consumption, Auxiliary Power Consumption and Station Heat Rate. Design station heat rate would be considered for evaluation.

National Efficiency Awards – 2024, to catalyze significant and innovative practices in the energy efficiency sector, for facilitating an energy efficient and sustainable growth of the Indian industry. With these awards, Mission Energy Foundation aims to recognize efforts by industries for their outstanding achievements and implementing new and innovative energy efficiency measures.

The Award this year is intended to foster the competitive spirit amongst various power stations so as to encourage them to improve performance in all spheres of their working. The Awards would also help in evolving benchmarks for various performance indices.

Award Categories Under National Efficiency Awards - 2024

**Best Energy Efficient
Plant – COAL**

**Best Energy Efficient
Plant – Lignite**

**Best Energy Efficient
Plant – CCGT**

**Best Energy Efficient
Plant – COAL (CPP)**

**Best Energy Efficient
Plant – Lignite (CPP)**

**Best Energy Efficient
Plant – CCGT (CPP)**

**Technology Company
of the Year**

**EPC Company
of the Year**

2nd Annual Conference on FLEXIBLE OPERATION OF THERMAL PLANTS + 3 Exclusive Award Categories

<https://missionenergy.org/flex2024/> | help@missionenergy.org | +91 98560 98360

Water Optimisation AWARD 2024

The **Water Optimisation AWARD 2024** will be presented to utilities and its services sector who demonstrate highest level of commitment and best practice in smart consumption of water at thermal power plants. Over the years the awards will aim to recognize exemplary operations, systems and the evidence of their impact to business vitality. The awards serve as a catalyst to understanding the intrinsic value of business excellence and sustainability.

Award Categories Under Water Optimisation Awards - 2024

**BEST WATER EFFICIENT
PLANT \leq 500MW**

**BEST WATER EFFICIENT
PLANT \geq 500MW**

**BEST ZERO LIQUID
DISCHARGE PLANT**

**WATER MANAGEMENT
- ASH HANDLING**

**TECHNOLOGY EXCELLENCE
- DESIGN & ENGINEERING**

**TECHNOLOGY EXCELLENCE
- TECHNOLOGY PROVIDER**

2. Residential participants shall be provided Twin Share Room for 2 nights
3. If a participant desires a Single Occupancy Room, then an additional amount of INR 15000 + 18% GST shall be charged on the respective registration fee

Organiser

The Organisation

Mission Energy Foundation is a persistent, private, not-for-profit endeavour based in Mumbai, India. We are registered under sec 25 (1), 80G & 12AA respectively.

The Beginning

A single man army with its mission to build platforms of discussion, exchange knowledge among industry professionals on core issues pertaining to growing energy sector.

GOAL

Mission Energy Foundation is a micro-enterprise initiative that strives to spread knowledge in the globalising energy sector. We educate and spread technology awareness through ongoing contacts and discussions with the public and industry concerning what the future of the growing energy sector should be...

Today

A human asset working together as one endeavour that expertise in organising and delivering successful international summits involving who's who from Entrepreneurs to Academicians to Government Authorities to Technology Providers to Consultants to Industry Professionals from the growing energy sector globally.

Mission Energy Foundation (A not-for-profit Organisation)

Payment Terms

Payment is required within 10 working days on receipt of invoice. If a booking is received 10 working days before the conference a credit card number will be taken to confirm your place, likewise if full payment has not been received before the conference date.

NOTE:

- Kindly fill the registration form completely
- Kindly provide with a valid email id for correspondence
- A confirmation of the registration will be sent via email after receipt of the payment
- No refund will be made in case of no-show / no-attendance
- Registration fee is exclusive of Government taxes as applicable

Cancellation Policy:

Should a delegate be unable to attend, a substitute delegate from the company is always welcome at no extra charge. Alternatively, for any cancellations, the following rules shall apply

- 70% refund of registration fee if cancellation is done on or before 20 working days of the schedule
- 50% refund of registration fee if cancellation is done on or before 15 working days of the schedule
- Thereafter, no refunds can be made

Important note:

Please quote the name of the participant and event title on the advice when remitting payment. Bank charges to be deducted from the participation organisation's own accounts. Attendance will only be permitted upon receipt of full payment. It may be necessary for reasons beyond the control of the organiser to alter the content or the event date or location or the identity of the speaker/s.

All bank charges to be borne by payer. Please ensure that our bank receives the full invoiced amount.

You want to pay from credit card (Only Indian VISA Cards accepted) you may do it from below link <https://missionenergy.org/payment.html>

Payment Terms

Payment is required within 10 working days on receipt of invoice. If a booking is received 10 working days before the conference a credit card number will be taken to confirm your place, likewise if full payment has not been received before the conference date.

- NOTE:**
- Kindly fill the registration form completely
 - Kindly provide with a valid email id for correspondence
 - A confirmation of the registration will be sent via email after receipt of the payment
 - No refund will be made in case of no-show / no-attendance
 - Registration fee is exclusive of Government taxes as applicable

Cancellation Policy:

Should a delegate be unable to attend, a substitute delegate from the company is always welcome at no extra charge. Alternatively, for any cancellations, the following rules shall apply

- 70% refund of registration fee if cancellation is done on or before 20 working days of the schedule
- 50% refund of registration fee if cancellation is done on or before 15 working days of the schedule
- Thereafter, no refunds can be made

Important note:

Please quote the name of the participant and event title on the advice when remitting payment. Bank charges to be deducted from the participation organisation's own accounts. Attendance will only be permitted upon receipt of full payment. It may be necessary for reasons beyond the control of the organiser to alter the content or the event date or location or the identity of the speaker/s.
