Tackling climate change is impossible without reducing our dependence on fossil fuels, especially coal. The problem is, coal is cheap and developing economies like India prefer low-cost fuel sources.

Coal-fired plants generate 70% of India’s electricity. This, combined with the growth of coal-consuming industrial sectors like steel, is why the solid fuel source will continue to be integral to India’s economy in the next couple of decades. This is despite the government’s ambitious plans to increase generation of renewable energy.

India is world’s second largest producer of coal; producing a tenth of the world’s coal and also being the second largest coal importer in the world.

The Indian government has been pushing for a target of 660 Million Tonne of coal production annually by end of FY 2021, most of which will be used in the power sector. In this context, current issues—status, policies, regulations, and bottlenecks—regarding the disposal of fly ash generated by thermal power plants are to be examined.

Electricity generation is responsible for two-thirds of India’s coal consumption with \(~35\%\) FLY ASH CONTENTS in Indian coal.

FLY ASH, the end product of combustion during the process of power generation in the coal based thermal power plants, is a proven resource material for many applications of construction industries and currently is being utilized in manufacturing of Portland Cement, bricks / blocks / tiles manufacturing, road embankment construction and low-lying area development, etc.

At present, 63% of the fly ash is being utilised and target is for 100% utilisation of the fly ash. There is need for education and awareness generation.

Road contractors and construction engineers need to know the benefits of using fly ash in construction.

Measures need to be taken to reduce the cost of construction of roads using fly ash by way of tax structure, subsidies and transportation services.

Besides, there is a need to prevent the ash from coming to the power plant by washing the coal at its place of origin.

The government should also come out with a policy to encourage fly ash use in cement plant.
Need of the hour:

**Conduct more research** on improving the quality of fly ash, grading fly ash generated by different technologies and types of coal, and feasible blending ratios for the cement industry.

The **BIS must update the blending standards**, which have not been revised since 2000.

**Improve transparency and reduce the costs of fly ash disposal** by Coal power plants.

**Limit fly ash production** through greater deployment of renewable energy sources, using better coal and combustion techniques, etc, since cement-related industries alone will not be able to absorb all the fly ash generated in the future.

**The key requirements for overcoming the barriers** are greater regulatory oversight and price control, revision of cement blending standards, research in improving fly ash quality, reducing cost of transportation, provisions for overcoming information asymmetries, and overall sensitisation of key decision-makers on the matter.

The issues which impede its full-scale utilization in India:

Indian fly ash is primarily of the calcareous or class C variety, implying that it possesses not only pozzolanic, but also hydraulic (self-cementing) properties. In contrast, European fly ash is of a silicious or class F variety, implying an absence of hydraulic properties.

BIS revised the maximum and minimum blending standards. While the **BIS is in line with the American standards on blended cement**, the European and South African standards allow the blending of fly ash up to 55%.

The **pricing of fly ash** is increasingly becoming a contentious issue that is hampering its gainful utilisation.

**Imperfections typical of quasi-markets**, such as information asymmetry and high transaction costs, vested interests, technical and technological limitations, and the lack of regulatory oversight and political will, have impeded the flow of fly ash to its most value-adding use.
Mission Energy Foundation suggested several policies and regulations-ranging from tighter air pollution standards and efficient technology to developing policy framework for managing waste products-to improve the sector. The results of Mission Energy Foundation’s study and its recommendations spurred a wide public debate and, over the last few years, the government announced a series of draft regulations and policies to help improve the sector’s performance. Both coal-based electricity and cement are crucial inputs to economic growth; their substitutability is limited due to various factors, discussions regarding which are beyond the scope of this article are being discussed at various forums of Mission Energy Foundation.

The 10th Annual FLY ASH UTILISATION 2021; is intended to provide a forum to meet and discuss the science and applications for coal ash and to transfer knowledge and ideas that will benefit their innovative utilization, processing, handling, storage, transportation and disposal.

Scenarios of ash generation and utilisation shall be presented by the industry experts alongside key technical, regulatory, pricing, logistical, and behavioral issues that shall be addressed to reach complete fly ash utilisation during the two days of value packed technical sessions at FLY ASH UTILISATION 2021.

FLY ASH UTILISATION 2021 - this year is a Two Day Residential Conference scheduled on 9 - 10 April 2021 at Country Inn & Suites - GOA; which is expected to again attract participants worldwide focusing on the business, logistics and technical challenges and opportunities in the coal combustion by-products sector. The two day of 360 degree technical discussions will be packed with multiple networking opportunities among regional and international guests.
Why Attend FLY ASH UTILISATION - 2021?

1. 10th Annual Residential International Conference
   Religiously & dedicateldy have given 12 years to the nation with 9 events on fly ash utilisation creating forums of discussion; exchange of ideas; sharing practical experiences; govt. advocacies and networking opportunities to professionals and businesses worldwide.

2. Recognising Efforts of TPPs with FLY ASH UTILISATION AWARDS
   Over the years Mission Energy Foundation have honoured hundreds of innovative developments and solutions for excellence and sustainability among the utilities, small or large, who have demonstrated their efforts and winning Fly Ash Utilisation Awards.

3. Team Building
   BOX Cricket Tournament is not just average team building activity. Its designed for thinkers and doers and arranged as Team Building Exercise among the Participants.

4. Live Entertainments
   Right from Participants Accompanying their Spouse to Cocktail Dinner to Cooking Classes, Mission Energy Foundation have kept the itinerary to keep you engaged at this knowledge enriching platform.

PARTICIPANTS PROFILE

- Regulators & Policy Makers
- Senior Executives of Steel, Power, Cement and Mining
- Utilities and Power Producers
- Industries Bodies and Business Chambers
- Research Institutes & Academia
- Environmentalists
- Technocrats & Consultants
- Logistic Companies & Suppliers
- Fly Ash Handling Experts
- Fly ash by-product Producers
- Construction and Real Estate Companies
- Scientists and Faculty
- Slug & Slurry Handlers
- & Many more...

Our aim is to deliver you an event that exceeds your expectations, thus becoming an integrated part of your annual marketing program.

Sponsoring this **FLY ASH UTILISATION 2021** will make your company stand out as a leader in this burgeoning industry and will leave a strong impression of your brand in key decision makers minds. Sponsors have an incredible amount of presence and it will not only give your company optimum exposure but also the opportunity for delegates to meet you and your executives to find out more about your role and business opportunities in the sector.

- Gain **PUBLICITY** with our advertising and promotional campaigns
- Obtain **DIRECT ACCESS** to potential clients during and after with our meticulously prepared confidential delegate list
- Receive a **KEY SPEAKING POSITION** to address an audience of top executives and decision makers from the industry
- Create **PERMANENT REMINDERS** of your product or services in conference documentation
- Profile yourself as **INDUSTRIAL LEADER**, as your corporate logo and profile will be featured prominently in event marketing collaterals
- **NETWORKING** with the industries leading Government Officials, Senior Level Delegates and Experts
- Achieve **GREATER EXPOSURE** and **BRAND BUILDING** through our partners and much more

**CONFERENCE AWARDS BOX CRICKET**
The Fly Ash Utilisation Awards 2021 will again be presented to utilities and its services sector who demonstrate highest level of commitment and best practice in utilisation of FLY ASH. Over the years the awards have its aim to recognize exemplary operations, systems and the evidence of their impact to business vitality. The awards serve as a catalyst to understanding the intrinsic value of environment management in business excellence and sustainability.

This year Fly Ash Utilisation Awards shall honour innovative developments and solutions for excellence and sustainability among the utilities, small or large, who have demonstrated their efforts in better utilisation of fly ash for the years to come ahead...

Mission Energy Foundation invites nominations from companies and their units having strong concern and commitment for fly ash utilisation and is willing to improve their own performance.

**AWARD CATEGORIES**

- Excellence in Policy Initiative – State Govt.
- Efficient Management of Fly Ash ≤500MW
- Efficient Management of Fly Ash ≥500MW
- Efficient Management of Fly Ash - CPP
- Green Building Material Award - Cement
- Green Building Material Award – AAC Blocks / Bricks / Others
- Technology Excellence – Design & Engineering
- Technology Excellence – Technology Provider
- Excellence in Research & Development
- Excellence in Transportation / Supply Chain

**KEY DATES TO REMEMBER**

- Nominations Opens: 15 February 2021
- Nominations Closes: 31 March 2021
- Winners Awarded: 10 April 2021
Throughout during the conference days, there will be a select number of leading solution providers who will discuss and advise on their latest products, solutions and services to a targeted number of senior level decision makers and technology-including regulatory affairs, financing structures and many more… Make sure you stay ahead of the competition and SECURE YOUR PLACE NOW!

You will benefit from multiple opportunities to talk with the clients and prospects you want to do business with and kick start your sales. All under one roof and all in just two days - saving you both time and money!

As exhibition space is strictly limited and is already booking fast! For booking of exhibition space, contact our representative right now!

Exhibiting at FLY ASH UTILISATION - 2021 is a cost effective and invaluable tool to help deliver your technology, product, equipment and services to senior decision makers of your core target market and will help grow your business in following ways:

**ENFORCE your BRAND** and promote your services to generate and customers bases interest

Meet senior level decision makers to **EASE of doing BUSINESS**

Make new contacts and **BUILD lasting RELATIONSHIPS**

**DISPLAY your CAPABILITIES** at an international platform to those developers, utilities and manufacturers who need your project financing services or project development technology.

Take advantage of a central point of contact from which to **DEVELOP BUSINESS** and raise your profile in this growing sector.

**STRENGTHEN existing BUSINESS PARTNERSHIPS** and create profitable new leads as you interact with your core customer base.

Participants will benefit from the high quality information exchange and networking opportunities. The expo will be marked by the presence of key decision makers and key players from the government and corporate world in India and abroad:

- Diplomats and senior government officials including policy makers and regulatory authorities
- Senior industry leaders from power, coal, chemical, etroleum and many other sectors
- Senior management teams from renowned private and public sector companies
- Entrepreneurs, technologists, operators and service providers
- Energy associates, producers and consumers
- International suppliers and trade organizations
- Equipment suppliers and service Companies
- Environmentalists, research and development scientists
- Investment banks & financial institutions

EXPO LAYOUT
BOX Cricket Tournament – 2021

It doesn't matter whether you know Cricket or not, this activity is just as engaging for a Cricket novice as it is for a passionate veteran. As a team building activity, it checks all the points; Strategy, change management, playing to your skills, competitive analysis, risk vs reward and more.

To increase the focus on enhancing coordination and productivity among the individuals within the team that thereby increasing output for an organisation for serving this purpose; thus, Mission Energy Foundation takes this opportunity to organise “BOX Cricket Tournament” this year during the FLY ASH UTILISATION 2021

BOX Cricket Tournament 2021 IS NOT JUST AVERAGE TEAM BUILDING ACTIVITY. IT’S DESIGNED FOR THINKERS AND DOERS.

Criteria:

8 Teams - 8 Players per Team
Participants need to apply during their registrations, teams will be selected / shortlisted by the organisers on various criteria’s set by them
If 4 or more participants are found interested in participating in BOX Cricket Tournament are from the same organisation; then they are eligible to be in a one team and also choose their captain
Necessary cricket gears will be provided by the organisers
Decision of the organisers if final and binding to all.

& MANY MORE...
The Organisation
Mission Energy Foundation is a persistent, private, not-for-profit endeavour based in Mumbai, India. We are registered under sec 25 (1), 80G & 12AA respectively.

The Beginning
A single man army with its mission to build platforms of discussion, exchange knowledge among industry professionals on core issues pertaining to growing energy sector.

GOAL
Mission Energy Foundation is a micro-enterprise initiative that strives to spread knowledge in the globalising energy sector. We educate and spread technology awareness through ongoing contacts and discussions with the public and industry concerning what the future of the growing energy sector should be...

Today
A human asset working together as one endeavour that expertise in organising and delivering successful international summits involving who’s who from Entrepreneurs to Academicians to Government Authorities to Technology Providers to Consultants to Industry Professionals from the growing energy sector globally.
