Annual International Residential Conference

Mission Energy Foundation have Religiously & Dedicatedly have given 16 years to the nation with 13 events on the fly ash utilisation creating forums of discussion; exchange of ideas; sharing practical experiences; govt. advocacy and networking opportunities for professionals and businesses worldwide.

International B2B EXPO

Exhibiting is a cost-effective and invaluable tool to help deliver technology, products, equipments and services to senior decision makers in a core target market and help to grow businesses at Fly Ash Utilisation - 2025

Recognising Efforts of TPPs with FLY ASH UTILISATION AWARDS

Over the years, Mission Energy Foundation has honored hundreds of innovative developments and solutions for excellence and sustainability among utilities, small or large, who have demonstrated their efforts and won Fly Ash Utilisation Awards.

Team Building & Live Entertainments

BOX Cricket Tournament is not just an average team building activity. It's designed for thinkers and doers and arranged as a Team Building Exercise among the participants with live entertainment hours during an organised networking cocktail dinner

FEBRUARY 2026

26 | 27 | 28

White Wharf Beach Resort, GOA

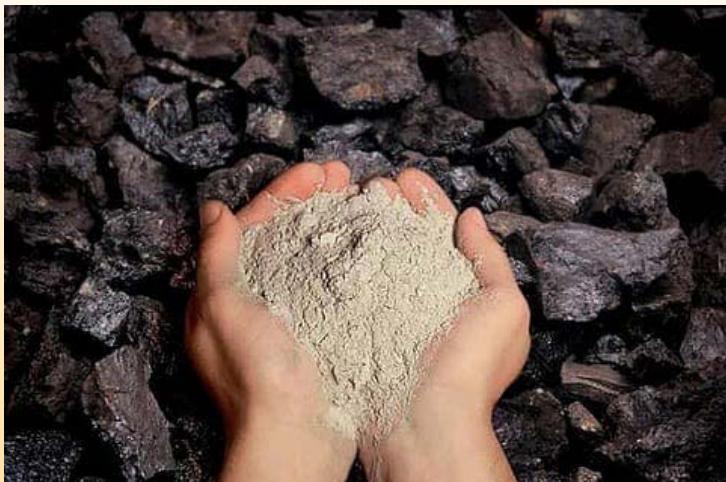

BRIEF BACKGROUND

Tackling climate change is impossible without reducing our dependence on fossil fuels, especially coal. The problem is, coal is cheap and developing economies like India prefer low-cost fuel sources.

Coal-fired plants generate 70% of India's electricity. This, combined with the growth of coal-consuming industrial sectors like steel, the solid fuel source will continue to be integral to India's economy in the next couple of decades. This is despite the government's ambitious plans to increase the generation of renewable energy. India is world's second largest producer of coal; producing a tenth of the world's coal and also being the second largest coal importer in the world.

The Indian government has its target approximately 1047.57 MT by the end of FY 2025, which is a provisional figure showing a 4.99% growth from the previous fiscal year. This will surpass the one billion tonne milestone during the fiscal year. The production growth was driven by increases from both state-owned and private/captive mines, most of which will be used in the power sector. In this context, current issues—status, policies, regulations, and bottlenecks—regarding the disposal of fly ash generated by thermal power plants are to be examined.

Electricity generation is responsible for two-thirds of India's coal consumption with ~ 35% FLY ASH CONTENTS in Indian coal.

What does that mean? - Comply or Get Penalised.

With last the Centre government notification on fly ash utilisation rule for Thermal Power Plants (TPPs), bringing them to mandatory utilise 100% of fly ash within three to five years. Existing provisions allow TPPs to fully utilise fly ash in a three-year cycle in a staggered manner.

The "polluter pays" policy, as applied to fly ash utilisation in India, is a key component of the Ministry of Environment, Forest and Climate Change (MoEF&CC) notification dated December 31, 2021, and its subsequent amendments by notifications on December 30, 2022, and January 1, 2024.

The Ministry of Power issued guidelines clarifying the process for the disposal and sale of remaining dry fly ash, bottom ash, and pond ash through a transparent process, in line with the MoEF&CC notifications and amendments up to January 1, 2024.

This policy establishes a strict penalty mechanism to ensure that thermal power plants (TPPs) adhere to mandatory ash utilisation targets.

help@missionenergy.org

+91 98560 98360

15th International Residential Conference + Expo + Awards

FEBRUARY 2026

26 | 27 | 28

White Wharf Beach Resort, GOA

Legacy Ash & Environmental Compensation

The 2021 notification also covers legacy ash (ash accumulated over decades in ash ponds). TPPs have a 10-year period from the date of the notification (ending around 2032) to utilise this accumulated ash in a staggered manner. Failure to do so within the deadline will also attract a fine of ₹1,000 per ton on the remaining unutilised quantity. TPPs that fail to achieve their specified annual ash utilisation targets must pay an environmental compensation of ₹1,000 per ton for the unutilised ash

Trigger for Penalty & Fund Use

In the first two years of a three-year cycle, if a TPP's ash utilisation falls below 80%, it is liable for the penalty on the unutilised quantity. If a TPP is unable to achieve 100% utilisation by the end of the third year of the cycle, it is liable to pay the compensation on the remaining unutilised quantity not penalised earlier. The funds collected from these penalties are to be used for the safe disposal of the unutilised ash and for promoting research and development into ash utilisation technologies

Compliance Cycle & Target Calculation

The rules operate on a three-year compliance cycle. TPPs must achieve an average of 100% ash utilisation over this period. The compensation is levied on the shortfall in achieving the mandatory utilisation percentages. For TPPs existing before the 2021 notification, the targets are phased (e.g., specific percentages like 80% to be reached in the first two years of a three-year cycle), and failure to meet these triggers the fine

Enforcement

The Central Pollution Control Board (CPCB) and State Pollution Control Boards (SPCBs) are tasked with monitoring compliance and levying the penalties. TPPs are required to submit monthly data on ash generation and utilisation through a web portal to facilitate this monitoring

PARTICIPANTS PROFILE

- ★ Regulators & Policy Makers
- ★ Senior Executives of Steel, Power, Cement and Mining
- ★ Utilities and Power Producers
- ★ Industries Bodies and Business Chambers
- ★ Research Institutes & Academia
- ★ Environmentalists
- ★ Technocrats & Consultants

- ★ Logistic Companies & Suppliers
- ★ Fly Ash Handling Experts
- ★ Fly ash by-product Producers
- ★ Construction and Real Estate Companies

15th International Residential Conference + Expo + Awards

FEBRUARY 2026

26 | 27 | 28

White Wharf Beach Resort, GOA

FLY ASH UTILISATION - 2026 is a national initiative designed to accelerate India's transition toward a circular economy, enhance resource efficiency, and promote sustainable industrial development. The three-day conference shall provide a forum to meet and discuss the science and applications of coal ash and to transfer knowledge and ideas that will benefit their innovative utilisation, processing, handling, storage, transportation and disposal. Participants across power generation, cement manufacturing, infrastructure, and technology innovation, the program directly supports India's environmental goals and international sustainability commitments.

Supporting the conference **Fly Ash Utilisation – 2026** through CSR funding allows companies to directly contribute to India's national priorities on circular economy, waste-to-wealth transformation, and low-carbon industrial growth. Fly ash remains one of the country's largest industrial by-products, and its utilisation is essential for reducing landfills, preventing environmental degradation, and enabling sustainable infrastructure development. By funding this initiative, companies play an active role in accelerating 100% utilisation of industrial waste, supporting innovation across high-impact sectors such as power, cement, infrastructure, and green materials. This aligns directly with Schedule VII of the Companies Act, which recognises environmental sustainability, ecological balance, and resource conservation as legitimate CSR activities.

Alignment with Global Sustainability Goals (SDGs)

SDG 9 – Industry, Innovation & Infrastructure

Encourages sustainable engineering and innovation in fly ash utilisation.

SDG 11 – Sustainable Cities & Communities

Drives adoption of fly ash-based green building materials in urban development.

SDG 12 – Responsible Consumption & Production

Promotes circular economy and large-scale reuse of industrial by-products.

SDG 13 – Climate Action

Supports CO₂ reduction through clinker factor optimisation and sustainable construction.

Alignment with India's National Missions

National Clean Air Programme (NCAP)

Encourages clean ash handling, dry extraction, and controlled utilisation.

MoEFCC Fly Ash Notifications

Promotes compliance with 100% utilisation norms through industry recognition.

PAT, CCTS & GEI Frameworks – Ministry of Power

Supports decarbonisation and energy-efficient cement manufacturing.

Gati Shakti & National Infrastructure Pipeline (NIP)

Enables sustainable construction of highways, railways, ports, airports and smart cities.

Circular Economy Mission – NITI Aayog

Positions fly ash as a priority circular material for national resource efficiency.

We invite interested organisations to support the Fly Ash Utilisation - 2026 as **Sustainability Partner** and join India's transition toward a cleaner, resource-efficient, and sustainable future.

15th International Residential Conference + Expo + Awards

FEBRUARY 2026

26 | 27 | 28

White Wharf Beach Resort, GOA

WHY FOCUSED CONFERENCE ON FLY ASH UTILISATION?

Mission Energy Foundation suggested several policies and regulations—ranging from tighter air pollution standards and efficient technology to developing policy frameworks for managing waste products—to improve the sector. The results of Mission Energy Foundation's study and its recommendations spurred a wide public debate and, over the last few years, the government announced a series of draft regulations and policies to help improve the sector's performance. Both coal-based electricity and cement are crucial inputs to economic growth; their substitutability is limited due to various factors, and discussions regarding which are beyond the scope of this article are being discussed at various forums of Mission Energy Foundation.

The **15th edition of FLY ASH UTILISATION 2026**; is intended to provide a forum to meet and discuss the science and applications of coal ash and to transfer knowledge and ideas that will benefit their innovative utilisation, processing, handling, storage, transportation and disposal.

Scenarios of ash generation and utilisation shall be presented by industry experts alongside key technical, regulatory, pricing, logistical, and behavioral issues that shall be addressed to reach complete fly ash utilisation during the three days of value packed technical sessions at FLY ASH UTILISATION 2026.

FLY ASH UTILISATION 2026 - this year is a **Three Day Residential Conference scheduled on 26 - 27 - 28 February at White Wharf Beach Resort, GOA**; which is expected to again attract participants worldwide focusing on the business, logistics, technical challenges and opportunities in the coal combustion by-products sector. The two day of 360 degree technical discussions will be packed with multiple networking opportunities among regional and international guests.

15th International Residential Conference + Expo + Awards

FEBRUARY 2026

26 | 27 | 28

White Wharf Beach Resort, GOA

Thursday, 26 February 2026

19:00 - 22:00 Hrs – Inaugural Function

Chief Guest Welcome Address

19:00 Hrs | Neelesh Kumar Sah, Joint Secretary (HSM) - Ministry of Environment, Forest & Climate Change*

Industry Leaders Welcome Addresses

19:30 Hrs | Radhakrishnan B, Chairman & Managing Director – **MAHAGENCO**

19:45 Hrs | Chandramouli Kasina, Executive Director (SSEA) – **NTPC Limited**

20:00 Hrs | Sanjay Mandhania, MD – **Ashtech India**

Organiser Welcome Address

20:15 Hrs | Ashwinkumar Khatri, DG - **Mission Energy Foundation**

Followed by Networking Cocktail Dinner

Technical Sessions - Friday, 27 February 2026

Theme: Creating Reliable Supply — From Ash Generation to Deliverable Material

09:30 – 11:30 Hrs | Why 100% Fly Ash Utilisation Is Still Not a Market — And How to Fix It

Pankaj Kumar Shrivastava, DGM - **NTPC Limited**

Shailesh Padol, CE (Environment & Safety) - **MAHAGENCO**

Nikhil Mittal, VP Commercial - **UltraTech Cement Limited**

Rakesh Raushan, ED Business Development - **Ministry of Railways**

11:30 – 12:00 Hrs | Networking Tea Break

12:00 – 13:30 Hrs | Dry Extraction, Conveying & Silo Systems – Engineering for Reliability

Dr Renhu Pan, MD - **Zhejiang Vitold Enviro-tech Equipment Co Ltd**

Rohit Shah, Director - **Save Eco Energy India Private Limited**

Amit Gupta, DGM Engg Mechanical – **BHEL Limited**

Suhas Damle, MD - **Deccan Mechanical and Chemical Industries Private Limited**

13:30 – 14:30 Hrs | Networking Lunch Break

14:30 – 15:30 Hrs | Panel Discussion: Let's Talk - Supply Chain and Economic Challenges

Moderator: Prasad Rao, President - **Ashtech India**

Dr. Abhishek Kumar Rai, Head - Group Quality, R&D and Innovation - **Adani Cement Limited**

M Venkata Ratnam, CEO - **BuildMate Projects**

Dr Ramani RV, Founder & CEO - **Argus Concrete Solution**

Pankaj Kumar Shrivastava, DGM - **NTPC Limited**

Shailesh Padol, CE (Environment & Safety) – **MAHAGENCO**

15:30 – 16:30 Hrs | Quality, Testing Protocols, LOI Control & Standardisation

Prasad Rao, President - **Ashtech India**

Ashwani Pahuja, Chairman & Managing Director - **NextCem Consulting**

M Venkata Ratnam, CEO - **BuildMate Projects**

16.30 | Networking Tea Break, followed by Box Cricket: A Networking Opportunity

21.00 – 22.30 | Entertainment & Networking Cocktail Dinner

Sponsor Now!

Our aim is to deliver you an event that exceeds your expectations, thus becoming an integrated part of your annual marketing program.

Sponsoring this **FLY ASH UTILISATION - 2026** will make your company stand out as a leader in this burgeoning industry and will leave a strong impression of your brand in key decision makers minds. Sponsors have an incredible amount of presence and it will not only give your company optimum exposure but also the opportunity for delegates to meet you and your executives to find out more about your role and business opportunities in the sector.

Gain **PUBLICITY** with our advertising and promotional campaigns

Obtain **DIRECT ACCESS** to potential clients during and after with our meticulously prepared confidential delegate list

Receive a **KEY SPEAKING POSITION** to address an audience of top executives and decision makers from the industry

Create **PERMANENT REMINDERS** of your product or services in conference documentation

Profile yourself as **INDUSTRIAL LEADER**, as your corporate logo and profile will be featured prominently in event marketing collaterals

NETWORKING with the industries leading Government Officials, Senior Level Delegates and Experts

Achieve **GREATER EXPOSURE** and **BRAND BUILDING** through our partners and much more

15th International Residential Conference + Expo + Awards

FEBRUARY 2026

26 | 27 | 28

White Wharf Beach Resort, GOA

EXHIBIT Now!

Throughout during the conference days, there will be a select number of leading solution providers who will discuss and advise on their latest products, solutions and services to a targeted number of senior level decision makers and technology-including regulatory affairs, financing structures and many more... Make sure you stay ahead of the competition and **SECURE YOUR PLACE NOW!**

You will benefit from multiple opportunities to talk with the clients and prospects you want to do business with and kick start your sales. All under one roof and all in just two days - saving you both time and money!

As exhibition space is strictly limited and is already booking fast! For booking of exhibition space, contact our representative right now!

Exhibiting at **FLY ASH UTILISATION - 2026** is a cost effective and invaluable tool to help deliver your technology, product, equipment and services to senior decision makers of your core target market and will help grow your business in following ways

ENFORCE your **BRAND** and promote your services to generate and customers bases interest

Meet senior level decision makers to **EASE of doing BUSINESS**

Make new contacts and **BUILD lasting RELATIONSHIPS**

DISPLAY your **CAPABILITIES** at an international platform to those developers, utilities and manufacturers who need your project financing services or project development technology.

Take advantage of a central point of contact from which to **DEVELOP BUSINESS** and raise your profile in this growing sector.

STRENGTHEN existing **BUSINESS PARTNERSHIPS** and create profitable new leads as you interact with your core customer base.

ENTITLEMENTS

★ **Branded Stand Structure**

- 2 Delegate Passes
- Company Logo on Summit Brochure
- Company Logo on Backdrop
- Two Chairs & One Table
- Fascia with Company Name
- Power Socket for Power Supply
- Branded Table
- 32" Plasma TV with HDMI
- Branded (Flex) Back Wall

- Confirmed Exhibitors -

★ **Branded Stand Fee:**

Indian Company: INR 200000 + 18% GST

Overseas Company: USD 3250

15th International Residential Conference + Expo + Awards

FEBRUARY 2026

26 | 27 | 28

White Wharf Beach Resort, GOA

The **Fly Ash Utilisation Awards 2026** will again be presented to utilities and their services sector who demonstrate the highest level of commitment and best practice in the utilisation of FLYASH. Over the years the awards had its aim to recognise exemplary operations, systems and the evidence of their impact on business vitality. The awards serve as a catalyst for understanding the intrinsic value of environmental management in business excellence and sustainability.

This year's Fly Ash Utilisation Awards shall honour innovative developments and solutions for excellence and sustainability among utilities, small and large, who have demonstrated their efforts in better utilisation of fly ash in the years to come ahead...

Mission Energy Foundation invites nominations from companies and their units who have their strong concern and commitment to fly ash utilisation and are willing to improve their own performance.

- CHIEF GUESTS -

Shri Suresh Prabhu
Global Strategist & Policy Architect

Why Fly Ash Utilisation Awards?

OBJECTIVE

Encourage & motivate to adopt best practices and become role models for others to emulate.

Encourage implementation of strategies for improvement in operations standards.

ADVANTAGES

Reflects your commitment to Environment Protection & enhances your corporate status and image.

Boosts morale of concerned employees and stakeholders, motivating management and staff of the organization to excel.

ELIGIBILITY

All Large, Medium, Small Scale TPPs / CPP / Service Sector Companies / Organizations and their units; Academic Institutions are eligible for participation for FLY ASH UTILISATION AWARD 2026

<https://missionenergy.org/flyash2026/>

help@missionenergy.org

+91 98560 98360

15th International Residential Conference + Expo + Awards

FEBRUARY 2026

26 | 27 | 28

White Wharf Beach Resort, GOA

- AWARD NOMINATION PROCESS -

Submit Nomination

Apply Online and make the payment.

Submit the completed application along with relevant information and we may contact for softcopy of the documents, if required.

If interested in applying for more than one unit / projects from the same company or more than one location, separate request for applications and fees should be submitted for each nomination.

Selection Procedure

Evaluation of nominations for Fly Ash Utilisation Award is an intensive process. Nominations are evaluated by experts from Government, Academia and Industry.

Preliminary evaluation of shortlisted nominations. Powerpoint presentation with original documents by all short-listed nominee companies / units shall be asked, if required.

Award Presentation

Relax and wait for the winner's announcement day i.e, 28 February 2026. If your nominated company / units have demonstrated the highest level of commitment and best practice towards the Fly Ash Utilisation Awards, you shall be recognised and honoured.

Winners of Fly Ash Utilisation Awards 2026 shall be honoured on the third day of the conference i.e., Saturday, 28 February 2026.

KEY DATES TO REMEMBER

**Nominations Opens
17 November 2025**

**Nominations Closes
30 January 2026**

**Winners Awarded
28 February 2026**

IPP 1500 – 2500 MW
IPP Above 2500 MW

Outstanding Fly Ash Utilisation	Integrated Ash Management	Innovation in Fly Ash Handling, Storage & Transportation	Best Long-Term Collaboration with Cement Industry
Recognising overall excellence in achieving maximum fly ash utilisation through efficient collection, storage, dispatch, and end-use linkages.	For comprehensive handling and utilisation of all ash streams — fly ash, bottom ash, and pond ash — within a sustainable and environmentally responsible framework.	For implementing innovative technologies or processes that enhance safety, efficiency, and reliability in ash collection and transfer systems.	For consistent, large-volume and quality-controlled fly ash supply partnerships with cement manufacturers through MoUs or structured contracts.
Best Long-Term Collaboration with Other Industries	Excellence in Ash Logistics & Dispatch Management	Sustainability in Ash Utilisation & Environmental Compliance	Innovation in Ash-Based Product Development (In-House or Collaborative)
Recognising sustained supply arrangements with brick, block, infrastructure, or reclamation projects, ensuring steady utilisation throughout the year.	For exemplary planning and execution of bulk fly ash evacuation through road, rail, or conveyor systems, ensuring minimal accumulation and efficient delivery.	For achieving statutory compliance (100% utilisation norms) and contributing to land restoration, mine backfilling, or greenbelt development using ash.	For developing new ash-based materials or value-added products within or in collaboration with user industries.
Excellence in Stakeholder Engagement & Community Participation	Digitalisation & Automation in Ash Management	Leadership in Circular Economy Practices	Overall Champion – Fly Ash Management Excellence
For initiatives that promote local entrepreneurship, MSME participation, or community-driven utilisation of ash-based materials.	Recognising power plants using digital monitoring, IoT, or automated control systems to track, optimise, and report ash generation and utilisation.	For organisations integrating ash utilisation into broader sustainability and resource efficiency goals, linking to circular economy principles.	The highest recognition for an organisation setting an industry benchmark through consistent, innovative, and sustainable fly ash management practices.

CPP 250 – 750 MW
CPP Above 750 MW

Integrated Fly Ash Utilisation within Cement Operations	Excellence in Closed-Loop Circular Economy (Power–Cement Integration)	Outstanding Fly Ash Utilisation – Captive Power Plant	Innovation in Fly Ash Handling & Feeding Systems for Cement Plants
Recognising CPPs that effectively channel their fly ash for in-house clinker and cement manufacturing, achieving near-zero ash disposal.	For seamless synergy between captive power generation and cement production lines ensuring full utilisation and material circularity.	For the highest annual percentage of fly ash utilisation (internal + external) achieved through disciplined operation and planning.	Recognising innovative methods for direct transfer, pneumatic feeding, blending or silo-based storage linked to cement manufacturing units.
Best Long-Term Supply Linkage with External Cement or Construction Units	Sustainable Ash Management & Environmental Compliance	Process Optimisation for Quality & Consistency of Fly Ash	Innovation in Ash Conditioning, Storage & Transfer Technology
For CPPs that supply fly ash to sister plants, franchise units or external cement manufacturers with consistent quality and logistics performance.	For meeting statutory ash utilisation targets and minimising environmental footprint (pond area, water use, fugitive dust, etc.).	Recognising power plants that ensure stable ash properties (fineness, LOI, reactivity) enhancing cement quality and productivity.	For adopting modern equipment, automation or process design to improve handling efficiency, safety and environmental performance.
Collaboration for Fly Ash Utilisation beyond Cement Sector	Digitalisation & Smart Monitoring in Ash Management	Leadership in Resource Efficiency & Carbon Reduction	Fly Ash Management Excellence – Captive Power Plant of the Year
For CPPs exploring additional avenues — bricks, geopolymers, ready-mix concrete, infrastructure — expanding beyond internal consumption.	Recognising the use of digital dashboards, IoT, or data analytics for real-time tracking of ash generation, utilisation and dispatch.	For initiatives linking fly ash utilisation to broader sustainability goals — reduced clinker factor, energy efficiency, or GHG reduction.	The top recognition for a CPP that demonstrates holistic excellence across integration, innovation, sustainability and performance.

Infrastructure Industry

- Sub Category -

Roads & Highways
Dams & Dykes
Railways
Ports
Airports
Smart Cities / Housing
Mine & Land Reclamation

INDIA'S MEGA INFRASTRUCTURE PROJECTS

Outstanding Fly Ash Utilisation in Infrastructure Projects	Innovation in Fly Ash-Based Construction Materials & Techniques	Integrated Approach to Fly Ash Utilisation Across Project Lifecycle	Excellence in Engineering Design Using Fly Ash
For demonstrating exceptional use of fly ash in large-scale public or private infrastructure projects (roads, dams, ports, railways, airports, etc.).	Recognising innovative adoption of fly ash in concrete, embankment fills, RCC pavements, or precast construction applications.	For projects integrating fly ash use from design to construction and maintenance phases, ensuring consistent performance and sustainability.	For outstanding engineering innovation that optimises fly ash use in structural or geotechnical design (embankments, subgrades, dykes, or fills).
Leadership in Sustainable Construction Practices	Best Collaboration with Power Generators for Fly Ash Supply & Quality Management	Excellence in Logistics, Handling & Field Application of Fly Ash	Pioneering Use of Fly Ash in Large-Scale Public Infrastructure
Recognising entities that embed fly ash utilisation as a core sustainability measure to reduce resource extraction and carbon emissions.	For establishing reliable, long-term partnerships with power plants ensuring timely ash supply, quality consistency, and efficient logistics.	For effective management of transportation, storage, and on-site application ensuring minimal wastage and environmental compliance.	Recognising landmark projects (national highways, ports, airports, metro, etc.) that have demonstrated exemplary fly ash utilisation at scale.
Innovation in Land Reclamation & Soil Stabilisation Using Fly Ash	Digitalisation & Monitoring in Fly Ash Utilisation Projects	Community and Ecosystem Impact through Fly Ash Utilisation	Fly Ash Utilisation Excellence – Infrastructure Project of the Year
For adopting fly ash in geotechnical and environmental restoration works such as mine void filling, flood protection, or coastal reclamation.	For use of digital platforms, sensors, or real-time monitoring to track and optimise fly ash usage, logistics, and quality assurance.	Recognising projects that generate positive social, environmental, and livelihood outcomes through fly ash-based infrastructure activities.	The top honour for a project or organisation demonstrating holistic excellence — covering technical innovation, sustainability, collaboration, and scale of utilisation.

Cement Industry

Outstanding Utilisation of Fly Ash in Cement Manufacturing	Leadership in Clinker Factor Reduction through Fly Ash Blending	Innovation in Fly Ash-Based Cement and Blended Product Development	Integrated Supply Chain Management for Fly Ash Procurement & Handling
Recognising cement plants achieving the highest percentage of fly ash blending in cement production while maintaining product quality and performance.	For sustained reduction of clinker content using fly ash as a major supplementary cementitious material, contributing to lower carbon intensity.	For developing or commercialising innovative cement types, geopolymers, or fly ash-based products enhancing strength, durability, or sustainability.	Recognising plants that have built robust sourcing, transport, and storage systems ensuring consistent supply and quality of fly ash from multiple sources.
Best Collaboration with Power Generators for Fly Ash Utilisation	Excellence in Fly Ash Quality Assurance & Process Control	Innovation in Material Handling, Storage & Feeding Systems for Fly Ash	Leadership in Circular Economy & Low-Carbon Cement Manufacturing
For establishing strategic, long-term partnerships with power plants or utilities for sustainable fly ash sourcing, quality control, and mutual value creation.	Recognising cement units that maintain precise chemical and physical consistency of fly ash through rigorous testing, blending control, and process optimisation.	For introducing advanced mechanical, pneumatic, or automated systems improving efficiency, safety, and environmental performance in ash handling.	For integrating fly ash utilisation within broader sustainability goals such as waste valorisation, carbon footprint reduction, and circular material use.
Digitalisation & Real-Time Monitoring in Fly Ash Utilisation	Sustainable Logistics & Long-Distance Fly Ash Transportation Management	Community & Ecosystem Partnership in Promoting Fly Ash-Based Products	Fly Ash Utilisation Excellence – Cement Plant of the Year
Recognising digital adoption — from supplier dashboards to process analytics — for monitoring ash quality, flow, and consumption patterns.	For efficiently handling inter-state or long-haul fly ash movement using multimodal logistics (road, rail, or sea) ensuring timely supply and utilisation.	For supporting downstream users (SMEs, RMCs, block makers, infrastructure projects) to increase fly ash-based product adoption in the market.	The premier recognition for overall leadership, innovation, and performance in sustainable fly ash utilisation across cement manufacturing operations.

AWARD CATEGORIES

R&D and Technology Providers

– Cross-Industry

Innovation in Fly Ash Utilisation Technology	Research Excellence in Fly Ash Characterisation & Performance Enhancement	Breakthrough in Ash Handling, Collection & Storage Systems	Innovation in Ash-Based Construction & Green Building Materials
Recognising cutting-edge solutions that enable new or improved uses of fly ash across industries — including material conversion, product formulation, or process efficiency.	For significant scientific studies improving understanding of fly ash properties, reactivity, classification, or blending behaviour in industrial applications.	For technology providers developing novel mechanical, pneumatic, or dry-handling systems enhancing safety, automation, and reliability.	For new material innovations — such as geopolymers, lightweight aggregates, bricks, blocks, or pre-cast products — derived from fly ash.
Digital & Smart Solutions for Ash Management	Best Collaboration between Industry and Academia	Sustainability Leadership in Circular Economy Solutions	Innovation in Fly Ash Beneficiation & Quality Improvement
Recognising development of digital dashboards, IoT sensors, or AI-driven analytics for real-time monitoring of ash generation, logistics, and utilisation.	For partnerships that bridge research outcomes with field implementation — demonstrating measurable impact in ash utilisation and environmental benefits.	For technologies or research projects promoting ash as a circular resource, reducing waste disposal, and aligning with national sustainability and SDG goals	For development of beneficiation processes (dry/wet classification, carbon removal, etc.) enhancing usability in cement, concrete, and high-value applications.
Pioneering Application of Fly Ash in Emerging Sectors	Scale-Up and Commercialisation of Fly Ash Utilisation Technologies	Outstanding Contribution to Policy, Standards & Knowledge Dissemination	Fly Ash Innovation Excellence – Technology Provider / Research Institution of the Year
Recognising new-age uses of fly ash — such as mine backfilling, ceramics, polymers, agriculture, or carbon-negative materials.	For successful transfer of lab-scale innovation into commercially viable, industrially deployed technologies.	For institutions or experts influencing policy frameworks, BIS standards, or knowledge platforms promoting safe and sustainable ash utilisation.	The highest recognition for overall contribution in research, innovation, implementation, and dissemination advancing fly ash utilisation across industries.

BOX Cricket Tournament

26 -27 - 28 February 2026 - GOA

BOX Cricket Tournament 2026 IS NOT JUST AVERAGE TEAM BUILDING ACTIVITY. IT'S DESIGNED FOR ENHANCING LEADERSHIP QUALITIES AND FORMING STRATEGIES FOR ACHIEVING A COMMON GOAL.

8 Teams 8 Players per Team

BOX Cricket Tournament – 2026

It doesn't matter whether you know Cricket or not, this activity is just as engaging for a Cricket novice as it is for a passionate veteran. As a team building activity, it checks all the points; Strategy, change management, playing to your skills, competitive analysis, risk vs reward and more.

To increase the focus on enhancing coordination and productivity among the individuals within the team that thereby increasing output for an organisation for serving this purpose; thus, Mission Energy Foundation takes this opportunity to organise "BOX Cricket Tournament" this year during the FLY ASH UTILISATION 2026

Criteria:

8 Teams - 8 Players per Team

Participants need to apply during their registrations, teams will be selected / shortlisted by the organisers on various criteria's set by them

If 4 or more participants are found interested in participating in BOX Cricket Tournament are from the same organisation; then they are eligible to be in a one team and also choose their captain

Necessary cricket gears will be provided by the organisers

Decision of the organisers is final and binding to all.

Organiser

The Organisation

Mission Energy Foundation is a persistent, private, not-for-profit endeavour based in Mumbai, India. We are registered under sec 25 (1), 80G & 12AA respectively.

The Beginning

A single man army with its mission to build platforms of discussion, exchange knowledge among industry professionals on core issues pertaining to growing energy sector.

GOAL

Mission Energy Foundation is a micro-enterprise initiative that strives to spread knowledge in the globalising energy sector. We educate and spread technology awareness through ongoing contacts and discussions with the public and industry concerning what the future of the growing energy sector should be...

Today

A human asset working together as one endeavour that expertise in organising and delivering successful international summits involving who's who from Entrepreneurs to Academicians to Government Authorities to Technology Providers to Consultants to Industry Professionals from the growing energy sector globally.

Mission Energy Foundation (A not-for-profit Organisation)

003, B-16, Sector 1, Shanti Nagar, Mira Road, Thane, Maharashtra - 401107
